## Infantile Paralysis!

### USE PEROXIDE

for protection

All authorities agree that protection against infantile paralysis is best accomplished by daily spraying or washing the nose, throat and mouth with a powerful antiseptic, and in this respect it is safe to say that peroxide is one of the most powerful antiseptics and germicides known. We carry a very high grade peroxide, which we think it is very advisable for you to keep on hand at all times. Good for daily toilet and emergency uses.
